

PRODUCT INFORMATION SHEET

Ratchet ring spanner with joint and sockets

Product description

A ratchet spanner with joint and a set of special sockets is perfect for unscrewing and tightening threaded joints with a hexagonal fixing element. Thanks to the ratchet, there is no need to take the spanner off the nut to make another turn, whilst the sockets allow for work with screws of various sizes. The 36-piece set makes it possible to get a full set of spanners in sizes 8 - 19 mm. Additionally, it includes 24 pieces of screwdriver bits together with an adapter. The universal application of the spanner allows for its usage both in the workshop, as well as in renovation, construction and installation works.
