

PRODUCT INFORMATION SHEET

Metal Saw Blade, Bimetal, 65x40 mm, Teeth, 1.2 mm

Product description

The blade is designed to be fitted to a multitool, such as the HT2E230-0MT. It can be used for cutting ferrous and non-ferrous metals, PVC and wood with nails. The blade is characterised by exceptional durability and wear resistance thanks to the use of bi-metal (BIM), which combines the strength of tool steel with the high hardness of M42 high-speed steel. The well-thought-out shape and width enable plunge and rip cutting, even in hard-to-reach areas. The universal attachment of the working tip fits most multitools on the market.

Characteristics

- intended for: ferrous and non-ferrous metals,
- PVC and wood with nails;
- blade width - 65 mm;
- blade length - 40 mm;
- tooth size - 1.2 mm;
- material - BIM/M42 steel.
