

PRODUCT INFORMATION SHEET

125mm Brushless Angle Grinder With Paddle Switch 18V + 2Ah Battery

Product description

A powerful and safe device for cutting and grinding metal, smoothing welds and removing rust. It is perfect for construction sites, renovations, car services, metalworking, and locksmith workshops. The maximum disc diameter of 125 mm and its high rotational speed of 8,000 RPM allow deep and fast cutting and, and thanks to the large abrasive surface, effective grinding. The safety paddle switch automatically switches off the grinder when it is released. It has two specialized covers to protect the user while cutting or grinding. They can be assembled quickly and easily without the use of additional tools. They allow a smooth adjustment of their position, adapting to the activity being performed. The small body circumference allows a more secure grip on the power tool and the soft handle dampens vibrations during use. The side anti-vibration handle stabilises, improves control, and comfort of work. It can be mounted in two different places. The HTE-WL brushless motor with its innovative design, thanks to the elimination of brush friction and special magnets, ensures greater power, longer operating time, and durability of the power tool. Advanced electronic systems constantly regulate the motor operation, optimising its power for the activity being performed, which translates into operational efficiency and maximization of battery operating time. The engine is protected against dust, metal particles and seizure. The durable metal gear housing perfectly dissipates heat, making the device operate more efficiently and last longer in use. The metal gearbox increases wear resistance and ensures the precision of the mechanism. The OneAccuSystem 18V enables the battery of your choice to be used in a wide and varied range of power tools for the toughest jobs.

Characteristics

Safety paddle switch. Maximum disc diameter – 125 mm. Rotational speed – 8000 RPM. Cutting cover. Grinding cover. Smooth adjustment of covers' position. Tool-free installation and adjustment of disc guards. Soft, non-slip handle. Additional anti-vibration side handle. Two-stage on/off switch. Metal gearbox housing. Metal gear mechanism. Spindle position lock. M14 mounting. Weight 1.5kg Noise level. Vibration level. Battery to be purchased separately. 3 year warranty. Brushless motor OneAccuSystem. Voltage 18 V
