

18V Brushless Jigsaw + 2Ah Battery

Product description

A versatile and efficient device for cutting curved and transverse shapes in wood, plastic, composites and metal. The brushless motor with its innovative design, thanks to the elimination of brush friction and special magnets, ensures greater power, longer operating time, and durability of the power tool. Advanced electronic systems constantly regulate the motor operation, optimising its power for the activity being performed, which translates into operational efficiency and maximization of battery operating time. The rotational speed of 0-2600 RPM and the saw blade stroke of 26 mm allow for faster and effective work. The 4-stage oscillation of the saw blade allows you to choose between fast and precise cutting. The foot tilt at an angle of 45°(left/right) allows for cutting oblique edges. Blowing air into the cutting area, increases the comfort and precision of cutting. The die-cast aluminium base provides greater operational stability, improved durability and lower weight. Tool-free assembly ensures a quick and easy blade replacement. The metal gearbox increases wear resistance and ensures the precision of the mechanism. Thermal protection protects the device against overheating during operation. Smooth regulation of rotational speed gives you full control over the activity performed. The soft grip handle enables a more secure grip on the power tool and dampens vibrations during work. The built-in LED diode perfectly illuminates the work area. The OneAccuSystem 18V enables the battery of your choice to be used in a wide and varied range of power tools for the toughest jobs.

Characteristics

- 4-stage blade oscillation.
- Foot tilt at 45°.
- Blowing air into the cutting area.
- Rotational speed: 0-2600 RPM.
- Blade stroke: 26 mm.
- Tool-free blade change.
- Base material - aluminium.
- Maximum thickness of wood to be cut - 135 mm.
- Maximum thickness of steel to be cut - 8 mm.
- Metal gear mechanism.
- LED light Smooth speed regulation.
- Anti-vibration soft grip handle.
- Brushless motor.
- Overheating protection.
- Weight 2.45kg.
- Battery to be purchased separately.
- 3-year warranty upon registration of the device.
- OneAccuSystem.
